

Colloidal Silver FAQ

What is Colloidal Silver Water?

Colloidal Silver Water is a pure substance of sub-microscopic clusters of silver, held in suspension in pure distilled water by a tiny electric charge placed on each particle. It is one of the powerful, natural antibiotics known to man. It is the most user friendly (no side effects) form of treatment for disease caused by bacteria, virus or fungi known.

How much Colloidal Silver Water will a kit make?

The kit will make literally gallons of Colloidal Silver Water. With normal use (1 - 2 times a week) the rods will easily last between 1 to 2 years. The silver comes off only one rod (the positive rod), therefore; when that rod becomes too thin - the rods can be switched over, thus using the thicker rod in the positive position.

How should Colloidal Silver Water be stored?

The use of distilled water ensures that the Colloidal Silver Water will last (if properly stored - away from all electrical appliances, in a dark glass bottle) without losing its effectiveness.

How often should I take Colloidal Silver Water?

In my own experience, for internal use, a tablespoon of Colloidal Silver Water in an 8 ounce glass of water taken daily has provided an enhanced immune system resulting in more energy, vitality, vigor, relaxation and reduced overall bodily toxins. It improves digestion and helps prevent colds, flu and all organism-caused diseases.

What does Colloidal Silver Water do?

Artificially produced antibiotics (drugs) only kill bacterial organisms while Colloidal Silver Water is known to kill bacteria, viruses and fungi without harmful side effects or toxicity in the human body and animals. It is harmless to human enzymes and has no known reaction with medications. In today's world of viral and bacterial pollution and mutations it is imperative that we begin to recognize the importance of alternative methods to cure diseases.

Have contemporary studies been done on Colloidal Silver Water?

While studying the regeneration of limbs, spinal cords and organs in the late 1970s, Robert Becker, MD, author of "The Body Electric", discovered that silver ions promote bone growth and kill surrounding bacteria. He recognized a correlation between low silver levels and sickness. He said the silver deficiency was responsible for the improper functioning of the immune system. Dr. Becker's experiments conclude that the silver works on the full spectrum of pathogens without any side effects or damage to any part of the body. He also states that the silver was doing something more than killing disease organisms. It was also causing major growth stimulation of injured tissues. Burn patients and elderly patients noticed more rapid healing. He discovered that all cancer cells change back to normal cells. All strains of pathogens resistant to other antibiotics are killed by colloidal silver. Yet at that time he could not find a silver supplement on the market.

The March 1978 issue of Science Digest, in an article, "Our Mightiest Germ Fighter", reported: "Thanks to eye-opening research, silver is emerging as a wonder of modern medicine."

An antibiotic kills perhaps a half-dozen different disease organisms, but silver kills some 650. Resistant strains fail to develop. Moreover, silver is virtually non-toxic. The article ended with a quote by Dr. Harry Margraf, a biochemist and pioneering silver researcher who worked with the late Carl Moyer, MD, chairman of Washington University's Department of Surgery in the 1970s; "Silver is the best all-around germ fighter we have."

Dr. Henry Crooks speaking about Colloidal Silver Water states "I know of no microbe that is not killed in laboratory in six minutes". His book, "Use of Colloids in Health and Disease" states that colloidal silver has proven particularly effective in cases of intestinal troubles. Further that the silver in colloidal state is highly germicidal, quite harmless to humans and absolutely non-toxic. All virus, fungus, bacterium, streptococcus, staphylococcus, and other pathogenic organisms are killed.

UCLA Medical Center has reported that "Silver Colloidal killed every virus that was tested in the lab".

How else can Colloidal Silver Water be used?

Topically (on the skin), Colloidal Silver Water is non-stinging, contains no free radicals, is a powerful antiseptic (disinfectant) and can cause rapid regeneration of damaged cells and tissues. It can even be poured in the eyes for redness, infections or damages.

Can I overdose on Colloidal Silver Water?

From personal experience, it's my understanding that the human body develops no tolerance level for the Colloidal Silver Water and one cannot overdose. I'm told it cannot cause harm to the liver, kidneys, organs or any other part of the body. The body eliminates Colloidal Silver through the kidneys, lymph and bowels within 3 weeks. The worst symptom reported with extreme dosage is mild diarrhea.

Does Colloidal Silver Water have a taste or smell?

It is colorless, odorless and tasteless in pure form. Its taste depends on its purity, pH level and age. The Colloidal Silver Water may develop a sour or bitter taste if the pH is not neutral. It may also develop a metallic taste if the concentration for silver is high or the solution has aged and started to oxidize or it is stored in plastic.

What diseases or conditions does Colloidal Silver Water address?

It is claimed that Colloidal Silver Water:

- * Diminishes dandruff, psoriasis, skin problems, fungus, eczema.
- * Cuts down time dramatically with coughs, pneumonia, staph, strep
- * Polyps and other masses shrinking reported when masses are injected.
- * Neutralize tooth decay and bad breath.
- * Skin itch, eye and ear infections, warts, some moles vanish.
- * Ringwood, arthritis, dermatitis, yeast infection.

Colloidal Silver Water uses before 1938

This is a list of some of the (pre-1938) documented uses of silver, including the colloidal form, for the treatment of various conditions and pathogens. This list in *no way* should be construed or

relied upon as medical advice. Always consult your health care professional if a serious condition exists.

Anthrax Bacilli

Appendicitis (post-op)

Axillae and Blind Boils of the neck

B. Coli

B. Coli Communis

B. Dysenteria

B. Pyocaneus

B. Tuberculosis

Bacillary Dysentery

Bladder Irritation

Blepharitis

Boils

Bromidrosis in Axille

Bromidrosis in Feet

Burns and Wounds of the Cornea

Cerebro-spinal Meningitis

Chronic Cystitis

Chronic Eczema of Anterior Nares

Chronic Eczema of Meatus of Ear

Colitis

Cystitis

Dacrocystitis

Dermatitis suggestive of Toxaemia

Diarrhea

Diphtheria

Dysentery

Edematous enlargement of Turbinates without True Hyperplasia

Enlarged Prostate

Epiditymitis

Erysipelas

Eustachian Tubes (potency restored)

Follicular Tonsillitis

Furunculosis

Gonococcus

Gonorrhea

Gonorrhea Ophthalmial

Intestinal Troubles

Leucorrhoea

Nasal Catarrh

Offensive Discharge of Chronic Suppuration of Otitis Media

Ophthalmology

Para-Typhoid

Perineal Eczema

Phlegmons
Phlyctenular Conjunctivitis
Pneumococci
Pruritis Ani
Puerperal Septicemia
Purulent Ophthalmia of Infants
Pustular Eczema of Scalp
Pyorrhea Alveolaris (Rigg's Disease)
Quinsies
Rhinitis
Scarlatina
Sepsis
Septic Tonsillitis
Septic Ulcers of the legs
Septicemia
Shingles
Soft Sores
Spring Catarrh
Sprue
Staphyloclysin (inhibits)
Staphylococcus Pyogenea
Staphylococcus Pyogens Albus
Staphylococcus Pyogens Aureus
Streptococci
Subdues Inflammation
Suppurative Appendicitis (post-op)
Tinea Versicolor
Tonsillitis
Typhoid
Typhoid Bactillus
Ulcerative Urticaria
Urticaria suggestive of Toxemia

Other uses for Colloidal Silver Water:

- * Spray inside of refrigerator, freezer to stop odors.
- * Spray surfaces that may harbor food poisoning, E Coli, Salmonella.
- * Add to cut flower vases, pet water, birdbaths.
- * Spray plant foliage to stop fungi, molds, rot and most plant diseases.
- * Stop unwanted fungi, molds and unwanted micro-organisms in potting soil.
- * Spray in shoes and between toes to stop athlete's foot.
- * Spray in garbage cans, kitchen sponges to prevent decay orders.
- * Treat shower stall, toilets, Jacuzzi's, pools, bath and shower mats.
- * Spray on clean air conditioner filters.
- * Use in final laundry rinse, damp towels will not sour or mildew.
- * Excellent for diapers & diaper rash.

- * Add to dishwasher, cleaning and mopping solutions.
- * Spray pet bedding and let dry.
- * Stop mildew, mold and wood rot.
- * Swab or spray air ducts and heater vents to prevent breeding sites for germs.

Testimonials for Colloidal Silver Water

My husband and I were introduced to Colloidal Silver Water August, 2005, since then it has become a part of our daily routine.

We were at friends and my husband had a huge sty on his eye, it was a very angry, swollen, red, weeping and painful. Michelle asked if she could try something, and my husband said sure. He had had this for 2 days. She soaked a cotton swab with Silver Water and put it on his eye, she did this 5-6 times, after the first couple of times he said the sting had gone and it felt better. The amount of grit that came out of his eye was amazing. She sent us home with a bottle and told us to apply it as often as we wanted. With in 2 days the sty was gone. This usually takes at least 2 weeks. To say the least we were stunned as he got them quite often.

When I was in my mid forties I got Chicken Pox, and I was covered, I had them in my mouth and for 8 years the ones in my mouth never went away, they were always there, either just under the skin or split open and painful. The Doctor said they would never go completely away, and prescribed numerous rinses for me to use when they split open. I'd hate to think of how much I have spent over the last 8 years, with no lasting results. I asked Michelle if I could rinse my mouth with Silver Water and she said yes and to swallow about a tablespoon a day. Well within 5 days all the bumps on the top of my mouth were gone. For the first time in over 8 years I could run my tongue along the roof of my mouth and there are no bumps and it is not tender. What a wonderful feeling.

The same week on the Friday, I was working out in the garden and cut my finger open quit badly. I washed the cut and applied Silver Water to it. I put it on the cut several times over the weekend and by Sunday. it was healed and no scar. A friend had seen the cut on Friday and then Sunday and couldn't believe it. She now uses Silver Water too.

Since August I have used Silver Water on various cuts, burns, etc. all with amazing results, and I have told other people about it. Quite a few have tried it and have had great result for numerous different ailments from acne to psoriasis, ect.

I have bought my own generator and it has paid for itself many times over. Our home will not be without it.

Over the last 7 months, twice I have gotten lazy, forgetful, what ever you want to call it, and have paid dearly for it. The last time was around Christmas. My mouth erupted with a vengeance, after not using Silver Water for 3 days. Started using it again and they are gone within 2 days.

Just this last week my husband got another sty. Not only one eye but both. Soaked them with Silver Water and 3 days later they are all but cleared up.

We thank Michelle for introducing us to Silver Water.

S. Rowe

My son is an incomplete quadriplegic.

He recently went through two awful bladder surgeries. While in the hospital he refused to use the silver water for fear of the medical practitioners. The incision, which was opened twice, couldn't

be stitched the second time because of so much swelling. It was two inches wide. After being released from the hospital, I poured the silver water over it daily for four days and it closed up. I literally watched it close. I was amazed. I also insisted that he drink the silver water, it helped very much with the infections and internal healing.

I have recently been given two extra large cats. While trying to show off the larger of the two, I was not just scratched but near shredded from elbow to wrist on the inside of my arm. I immediately poured the silver water over the site. The next morning the open sores were closed and barely visible. Day three all there is left is slight bruising.

Needless to say I am a believer!

Thank you, Michelle

~ Lorna

Years of uncomfortable itching.

There have been years upon years of uncomfortable itching with athletes' foot trying dozens of different powders and ointments. Some more successful than others, some providing longer relief than others, all temporary; none actually being a cure.

Then, I tried silver water. Soaking cotton balls and putting them between my toes for 10 to 15 minutes for several nights in a row. The relief from the burning itch was almost immediate.

Upon a reoccurrence several weeks later, I repeated the process. It's been over a year now and there's been no more itching at all, not a sign of that lifelong pest - athlete's foot.

~Ken
